Specification

The amendment filed 06 April 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a hydrophobic matrix polymer and a hydrophilic non-ionic polymer wherein said proton-conducting membrane is a single-phase, substantially non-porous structure. Please see discussion below.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 31-60 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 31, as amended, recites:

a selectively proton-conducting membrane ... said membrane containing:

- (i) a hydrophobic matrix polymer and
- (ii) a hydrophilic non-ionic polymer

wherein said proton-conducting membrane is a single-phase, substantially non-porous structure.

The recitation of a single-phase, substantially nonporous structure formed from a hydrophobic polymer and a hydrophilic polymer is not disclosed in applicants' specification as filed. Applicants cite paragraphs 192 and 202 (of US 202/0127474 A1) as disclosing a single phase membranes. However, these paragraphs do not disclose a single phase membrane *containing a hydrophobic matrix polymer and a hydrophilic non-ionic polymer*. The paragraphs noted by the applicants discuss single phase membranes in general terms, but do not discuss specifics of single phase membranes containing a hydrophobic matrix polymer and a hydrophilic non-ionic polymer. Because hydrophobic polymers are antagonistic to water and hydrophilic polymers have a strong tendency to bind or absorb water, such a combination of polymers, analogous to oil and water, would not be expected by one of ordinary skill in the art to be mutually soluble or to form a single phase.

The prior art rejection of claims 31-33, 37, and 39 under 35 U.S.C. 102(b) as being anticipated by Oka et al., US Patent 5,830,603, claims 31, 37, 46 under 35 U.S.C. 102(e) as being anticipated by Maletin et al., US 2002/0097549 A1 and claims 47-49 under 35 U.S.C. 103(a) as being unpatentable over Maletin et al. are withdrawn in view

of applicants amendments. However, these rejections would be reinstated if the new matter is removed from the claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
